REPORT TO GOVERNOR  
DIRECTORY OF MINES  
COAL AND COKE STATISTICS

## PRELIMINARY REPORT

To His Excellency,  
**WILLIAM G. CONLEY,**  
 Governor of West Virginia.

Sir:

I herewith submit to you my eleventh Annual Report of the Department of Mines, it being the forty-eighth annual report of the condition of the coal industry of the state.

The period covered by this report is from January 1, 1930 to December 31, 1930, and is compiled from the annual reports as submitted by the mine operators. It is condensed in form and only those statistics of general importance and necessary for the information of the public are given in detail.

### PRODUCTION OF COAL AND COKE

Five hundred and eighty-four companies, operating 866 mines and employing 107,832 men, reported a production of 122,429,767 tons of coal and 427,679 tons of coke, a decrease in the coal production of 16,868,179 tons and in the coke production of 71,678 tons.

Below you will find a comparison of the production of coal and coke for the calendar years 1929-30, together with the change in same.

	1929	1930	Decrease	Percentage
Coal.....	139,297,946	122,429,767	16,868,179	12.11
Coke.....	499,357	427,679	71,678	16.63

During the year 1930 the coal production of the state decreased 12.11 per cent under the production for the previous year, and the coke manufactured decreased 16.63 per cent during the same period. Below you will find the estimated value of both coal and coke for the year 1930.

Total value of coal produced (122,429,767 tons).....	\$ 178,747,459.82
Value of coal used in operating (489,938 tons).....	715,309.48
Value of coal sold local trade and tenants (1,752,268 tons).....	2,558,311.28
Value of coal used in coke ovens (715,028 tons).....	1,043,940.88
Value of coal shipped from mines (117,972,533 tons).....	172,239,898.18
Value of coal mined by small wagon mines (1,500,000 tons).....	2,190,000.00
<b>TOTAL.....</b>	<b>\$ 178,747,459.82</b>
Value of coal sold (121,224,801 tons).....	176,988,209.46
Value of coke sold (427,679 tons).....	1,866,010.57
<b>TOTAL.....</b>	<b>\$ 178,854,220.03</b>

The coal produced was disposed of in the following manner:

Produced by small country mines—sold at mines.	1,500,000
Used in operation of mines.	489,938
Furnished local trade and tenants from commercial mines.	1,752,268
Used in coke ovens.	715,028
Shipped from mines.	117,972,533
<b>TOTAL</b>	<b>122,429,767</b>

The tonnage produced during the year originated in the several geographical districts, and is compared with the tonnage for 1929 as follows:

DISTRICT	1930	1929	Decrease
Panhandle.	5,100,306	6,321,594	1,221,288
Fairmont	19,778,897	23,302,235	3,523,338

Logan	17,858,262	19,965,162	2,106,900
Pocahontas.	24,800,902	29,540,108	4,739,206
Mingo	5,310,935	6,117,997	807,062
Small Mines.	1,500,000	1,500,000	.....
<b>TOTALS</b>	<b>122,429,767</b>	<b>139,297,946</b>	<b>16,868,179</b>

During the year 1930 there were 2,656 mining machines in use at 733 mines, employing 53,018 men and producing 104,794,993 tons of coal, which is 85.59 per cent of the total production of the state. The following table exhibits the growth of machine mining since the year 1897.

The mines of the state averaged 170 days for the past year.

### COKE OVENS AND COKE PRODUCED

Coke plants in the state during the year reported a total of 2,094 coke ovens, of which number 1,131 were in actual operation.

There were 715,028 tons of coal converted into coke, which gave a yield of 427,679 tons of coke and gave employment to 420 persons. The decrease in the production of coke as compared with the previous year was 71,678 tons. The average price per ton of coke was \$3.83.

### MEN EMPLOYED

During the year 1930 there were employed at the mines and coke ovens within the state an average of 107,832 persons. Of the total number employed there were:

9,207.....	Pick Miners
48,496.....	Machine Miners
4,522.....	Machine Runners and Helpers
29,926.....	Inside Laborers
15,261.....	Outside Laborers
420.....	Coke Workers

Counting the superintendents, mine foremen, fire bosses, store managers, store and office clerks, it would be safe to add five persons per mine employed in these capacities. Basing this estimate on 866 pro-

ducing mines, it would make a total of 4,330 persons, or a grand total of 112,162 employees directly connected with the operation of the mines.

The nationalities of the persons employed in and around the mines are given in a tabulated form in another part of this report, and the totals of the various nationalities are as follows:

Americans (White).....	66,022
Negroes.....	23,523
Italians.....	4,225
Hungarians.....	3,503
Polish.....	2,474
Austrians.....	843
Russians.....	1,137
Spanish.....	836
Slavish.....	1,284
Greeks.....	532
Lithuanians.....	641
English.....	490
Other Nationalities.....	2,322
<b>TOTAL.....</b>	<b>107,832</b>

### SHIPMENTS OF COAL AND COKE

For the year 1930 the operating coal companies of the state reported 116,416,790 tons of coal and 427,679 tons of coke shipped over the railroads from the mines in the state. They also reported for the same period 1,555,743 tons of coal shipped by river, 1,300,053 tons of which originated and were floated down the Great Kanawha, and 255,690 tons were shipped on the Ohio River. This does not include the tonnage of fuel consumed by water craft and local river trade. No coal was shipped on the Monongahela River, and no coke was shipped by water, either on the Kanawha, Monongahela or Ohio Rivers during the year.

### SELLING PRICE OF COAL AND WAGES PAID

During the year 1930 the average price received by pick miners throughout the state for mining run-of-mine coal was 76 cents. The average tonnage produced by each pick miner was 1,785 tons. The average annual wage of pick miners (all pick miners included) was \$1,356.60.

The average selling price of coal shipped from the mines of the state was \$1.46 per ton run-of-mine coal.

Coke was sold f. o. b. at the ovens during the year at an average price of \$3.83 per ton.

### ACCIDENTS

There were 412 lives lost in connection with the mining industry of the state during the year covered by this report. Of this number 394 were killed inside the mines and 18 outside.

There were 2,960 non-fatal accidents at the mines during the same period, 2,599 of which were inside the mines and 361 outside.

The following is a list embracing all accidents in which two or more men lost their lives, giving the cause and date, number killed and where the accident occurred:

County	Name of Company	Mine	Date	Number		Cause
				Killed		
Raleigh.....	Lillybrook Coal Company	No. 1.....	1-19-30	8		Local Gas Explosion
Raleigh.....	Lilly & Hornbrook, Inc.	Crab Orchard	2- 1-30	2		Slate Fall

### TONNAGE PER FATALITY

Since the year 1883, the average number of tons of coal produced per each fatality inside the mines was 201,480 including the period covered by this report, which is 310,735 tons. At the mines where fatal accidents occurred, there was an average of one life lost for each 173,084 tons of coal produced. The 394 lives lost inside the mines during the year occurred at 249 mines, employing 47,892 persons inside and producing 68,195,002 tons of coal, while the other mines, at which not a single life was lost inside, produced 54,234,765 tons. During the year covered by this report the causes of accidents in which lives were lost inside the mines are summarized as follows:

Killed by explosions (all forms).....	21
Killed by falls of roof and coal.....	246
Killed by mine cars and motors.....	90
Killed by electrocutions.....	17
Killed by other causes.....	20
<b>TOTAL.....</b>	<b>394</b>

Since 1897 there have been killed inside the mines of the state as follows:

Killed by falls of roof and coal.....	5,901
Killed by mine cars and motors.....	1,710
Killed by gas explosions.....	604
Killed by dust explosions.....	1,037
Killed by electrocutions.....	462
Killed by other causes.....	1,321
<b>TOTAL.....</b>	<b>11,035</b>

The experience of persons killed and injured for the past thirty years, from 1901 to 1930 inclusive, is as follows:

Having an experience of one year or less.....	6,188
Having an experience of two to five years.....	12,717
Having an experience of six to ten years.....	9,442
Having an experience of eleven to twenty-five years.....	10,379
Having an experience of twenty-five to fifty years.....	2,348
Having an experience of many years.....	1,776
Having an experience of unknown years.....	8,404
<b>TOTAL.....</b>	<b>51,254</b>

Since the year 1908 the average lives lost inside the mines for every 1,000 persons employed is 5.49.

Ratio per 1,000 employed inside the mines during 1908.....	12.24
Ratio per 1,000 employed inside the mines during 1909.....	6.72

The foregoing contains only a summary of the most important information contained in this report, but a reference to the pages following will reveal the condition of the mining industry of the state and show something of its importance in our industrial development.

During the year 1930 the number of employees in coal mining remained substantially the same as in the preceding year. The number of working days, however, fell from 207 to 170, while tonnage decreased sixteen million tons. These statistics show that the mines could produce over two hundred million tons per year on full running time.

Since 1927 our tonnage has been declining rapidly and causing a serious condition in regard to employment. The outstanding reason for the yearly loss of production since 1927 when a high tonnage peak was reached, a loss of nearly 24,000,000 tons, can be attributed mainly to the higher freight rates that must be absorbed by the West Virginia operators before they can compete in the large consuming markets. Every mining district in the state suffers from rate differentials favorable to

our competitors, notwithstanding the fact that our competitors are favored by much better mining conditions, which give them a better production cost. The West Virginia operator "must depend," therefore, on the adaptability of his coal to varied uses and the careful and systematic preparation of his output for the markets. That the industry in West Virginia has survived, considering the obstacles the operators have had to overcome, is attributable to their capacity for improving the quality of their marketable product.

While the safety of our men and the conservation of our resources are the main objectives of this department, we have assisted and are at all times ready to render assistance to the industry to overcome those artificial impediments that affect its welfare and the prosperity of those dependent upon it.

The Oil and Gas Division during 1930 issued 507 permits to drill and received notices on the abandonment of 220 wells. Plans were approved for the pillars to protect 218 wells and the mines through the workings of which they pass. During the year the operation of this Division has been principally confined to the coal areas of the state, and the protection of the mines and men working therein has been the main object to be attained.

With a view to securing a maximum amount of protection to the coal seams and the oil and gas-producing strata of the state and the building up of records which will be valuable to the industries in the future, the department has drafted and put into effect a system of reports and records whereby such information is collected and filed. This system is unique in that it provides that adjacent lease or property owners must be given notice of the time and the manner of plugging adjacent wells and have the privilege of being present to see that such wells are plugged and filled in the manner required by the law and approved by the Department of Mines. By this feature the Department hopes to bring about a more uniform and effective method of protection to the natural resources of the State.

To the miners, officials and operators I extend my sincere appreciation for their continued cooperation and assistance, without which we could not have functioned properly.

It is my pleasure to express to your Excellency my sincere thanks for the splendid support I have at all times received from you in all departmental activities.

Respectfully submitted,

R. M. LAMBIE,  
Chief of Department of Mines.
